

Our Team,
CHENEGA FEDERAL SYSTEMS
Your Solution

INFORMATION TECHNOLOGY

Chenega Federal Systems, LLC (CFS) is a professional services provider supporting the Defense and Intelligence sectors of the federal government, and a broad-range of federal agencies. Our client base spans across Department of Defense (DoD) to include all five service components, combatant commands, the Intelligence community, civil agencies, and commercial and private sector corporations.

CFS provides services to federal agencies in the area of Information Technology, including:

United States Army Geospatial Center (AGC)

CFS is responsible for the configuration and maintenance of the Joint Geospatial Enterprise Services (JGES) and networking equipment (including helpdesk) requirements.

Federal Emergency Management Agency (FEMA)

CFS provides onsite technical support, comprised of computer networking, hardware and software procurement, and webmaster and systems administrator functions. This includes operating and maintaining the applications and databases supporting United States Fire Administration (USFA) and Emergency Management Institute (EMI) at the National Emergency Training Center (NETC) in Emmitsburg, Md.

Bureau of Indian Affairs (BIA)

CFS provides Information Technology services to the IT infrastructure of the Bureau of Indian Affairs (BIA) and the Bureau of Indian Education (BIE). Our support services include helpdesk call center, desktop support, private branch exchange, network services, messaging systems, mainframe, applications and database support, general systems administration, technical writing, configuration management, and contract management.

Joint Military Information Support Center (JMISC)

Leveraging and supplementing existing programs and architecture established by the Expanded Trans-Regional PSYOP program, CFS capitalizes on emerging commercial information technology services and wireless telephony technologies to enhance and reinforce mass-media delivery systems.
