## TRAINING SERVICES

**Chenega Federal Systems, LLC (CFS)** is a professional services provider supporting the Defense and Intelligence sectors of the federal government. Our client base spans all five service components of the Department of Defense, various combatant commands, the Intelligence community, civil agencies, and commercial/private sector corporations.

CFS is a leader in training support, fulfilling the training needs of several military organizations, including the United States Air Force Office of Special Investigations, the United States Navy, the United States Southern Command and the United States Marine Corps Warfighting Laboratory.

### **United States Air Force Office of Special Investigations (AFOSI)**

CFS provides project management; budget analysis, oversight, requirements; analysis and coordinator support; warfighting tasks, training and technical support; and surveillance detection in:

- Warfighting/Project support training coordination, including analysis of existing and anticipated requirements
- Assisting in forecasting AFIT, FSI, DLI and local training initiatives
- Financial management
- Psychology support, including behavioral sciences consultation regarding operations, investigations, analysis, research and training
- Defense Travel System (DTS) training and support

### **Strategic Systems Programs, United States Navy Operations, Evaluation and Training Branch (SP-205)**

CFS delivers acquisition and life-cycle support of training materials, personnel and training evaluation, electronic classroom support, training simulator support and manpower planning and analysis to the U.S. Navy, and the United Kingdom's Tactical Real-Time Interaction in Distributed Environments (TRIDENT) Training Program.

CFS offers expertise in:

- Onsite Electronic Classroom (EC) and training simulator facility support, including training materials and software
- Development of self-paced training materials for the Navy's Authoring Instructional Materials (AIM) program, including assistance in the planning, execution and follow-on support of training meetings and technology conferences
- Test development, administration, scoring and analysis for the SWS Personnel and Training Evaluation Program (PTEP)
- Reviewing technical materials for training impact and implementing special training studies and analyses as required

## TRAINING SERVICES

### **United States Southern Command (USSOUTHCOM)**

CFS manages all aspects of SOUTHCOM training, including intelligence, technical and operations support in Guantanamo Bay, Cuba, in Miami, Fla., and other locations in support of ongoing Overseas Contingency Operations (OCO). The CFS team specializes in supporting a broad range of training needs, including:

- Evaluating and recommending all command training plans, including creating and maintaining training budgets and evaluating objectives and initiatives
- Joint intelligence training and training requirements analysis – compiling, collating, analyzing and evaluating all sources of training and making recommendations for plan execution
- Creating, maintaining and recalling data in support of training and budget management
- Evaluating training objective accomplishments
- Supporting and assisting in the development of Defense Intelligence Agency (DIA) civilian training and education
- Researching new and innovative training programs
- Researching, planning, designing and preparing training materials; including multi-media reports and programs, computer and web-based training, web pages, messages, briefings, information papers, forecasts and trip reports
- Preparation and coordination of DIA's Joint Intelligence Virtual University, and integration of all aspects of intelligence training
- Language training

### **United States Marine Corps Warfighting Laboratory (MCWL)**

CFS offers a full range of engineering, analytical, technical and business services for the Marine Corps Warfighting Laboratory – the only laboratory operated by the United States Marine Corps. These services include, but are not limited to:

- Weapons and technology integration; including training Marine forces on newly introduced weapons, optics, ordinance, armor, communications equipment and combat equipment
- Integration and synchronization of project schedules
- Public Affairs support services training; including planning, preparing, coordinating and conducting Public Affairs Office (PAO) training
- Maintenance of current training methodology, including program system and evaluation
- Development and maintenance of POIs in accordance with Individual Training Standards (ITS)
